Deanswood Interiors dart fabric

The Deanswood Interiors® dart fabric is designed for areas where a high level of light exclusion is required along with exceptional performance characteristics. The Flame Retardant Fibreglass composition with a PVC coating for easy clean, ensures this fabric is suitable for almost all applications. With 13 colours and the most advanced range of fabric widths available, fabric joins are kept to a minimum to assist in wastage, design and speed of fabrication. This fabric contains Biosafe® which is the international accreditation standard of our proven antimicrobial formula that has been tested under the most stringent measures to ensure effective inhibiting of infection.

Fabric Composition: 4-ply; 75% PVC, 25% Fibreglass
Fabric Range: 13
Louvre Widths: 127mm (5") / 89mm (3.5") / 63mm (2.5")
Vertical Roll Length: 100m
Roller Fabric Width: 1830mm (72") / 2500mm (98.4") / 3000mm (118.1")
Roller Fabric Length: 30m
Fabric Thickness: 0.25mm - 0.33mm
Fabric Weight: 407 g/m² - 12oz/syd
Fire Retardancy: Conforms to BS5867, Part 2: Type B 2008; IMO 2010 FTP Code

Shading: Blackout. Suitable for computer environments
Moisture Resistance: Suitable for moist conditions
Anti Bacterial: Incorporates Biosafe® formula
Care Instructions: Wipe clean

shading efficiency

Transmittance is the amount of light and heat transmitted beyond the fabric. The lower the amount, the greater the efficiency.
Block/reflect is the amount of heat and light that is blocked or reflected. The higher the amount, the greater the efficiency.
Absorption is the amount of heat and light absorbed in the fabric. The higher the amount, the lower the efficiency.
Ultraviolet protection illustrates how protective the fabric is in protecting against ultraviolet rays. The higher the amount, the greater the effectiveness.

this fabric range comes with a full LIFETIME Warranty as standard.

this fabric range comes with a full BIOSAFE Accreditation as standard.
